The LPO in Occitanie region acts for the nature and prevent the rapid loss of biodiversity, using knowledge of environmental issues, educating the population and setting up actions to promote and protect wildlife.

Supported by 4000 members, hundreds of active volunteers, 28 employees and a network of over 2000 LPO Refuges, it functions in the many domains of environmental protection and also manages two wildlife rescue centres and two regional nature reserves.

Using a participatory inventory tool, it also manages and collects 4 million items of data sent in by over 1000 observers referring to 25 taxonomic groups.
